The History of Alupe University

Alupe University is a product of a memorandum handed to the former President of Kenya, His Excellency Hon. Mwai Kibaki, by the Busia Community on 18th September 2007. The community expressed the need to establish a University in the region. This culminated in the establishment of the Alupe Campus of Moi University in 2008, which offered a School based programme for the School of Education. Later, it was established through the Alupe University College Order, 2015 (Gazette Notice No 153 of 24th July 2015) as a Constituent College of Moi University after a wide range of intergovernmental and ministerial consultations. On the 2nd of August 2022, Alupe University reached a significant milestone in its journey. It was granted the status of a Chartered Public University, a testament to its pursuit of academic excellence and institutional growth.

This prestigious award was bestowed by the former President, His Excellency Uhuru Muigai Kenyatta, C.G.H. at State Lodge, Kakamega

.Alupe University, strategically located near internationally acclaimed research institutions, has developed collaborations that facilitate the discharge of its mandate. These institutions, including the Kenya Medical Research Institute (KEMRI), Kenya Agriculture and Livestock Research Organization (KALRO), and the Lake Basin Development Authority (LBDA), provide a rich environment for teaching, research, and extension services. This proximity underscores AU's commitment to academic excellence and community service.

The University currently has four schools: the School of Health Sciences, the School of Science, Technology and Engineering, the School of Education and Social Sciences, and the School of Business, Economics and Human Resource Development. The student and staff population has steadily increased since the University's inception. The infrastructure has been enhanced, with accredited science laboratories, a micro-teaching laboratory, a library, an ultra modern 600 capacity Amphitheatre, a lecture hall and rooms, and boardrooms.

Alupe University was established as a science-based institution. This has focused activities around teaching, research and outreach. The University has singled out the School of Health Sciences as the flag-ship school.

Its programmes are crafted to leverage on science to provide health solutions to society. It is worth noting that the School hosts one of the country's accredited Medical Laboratory Sciences (MLS) laboratories. Similarly, the School of Science, Technology and Engineering is the hub for technological innovations.

At Alupe University, science finds a home in an integrated way. For instance, every programme has an aspect of science – whether in its curriculum delivery or the courses under it. As evidence, the School of Education and Social Sciences houses science-based programmes such as Bachelor of Education (Science) and Bachelor of Science in Counseling Psychology. The School of Business, on the other hand, houses programmes in Information Systems and Management Science, among others.

Additionally, Alupe University offers a range of Arts-based courses, and the faculty has continually employed an interdisciplinary approach to curriculum delivery and research. Generally, the University prides itself in offering various programmes whose common thread is the scientific approach to teaching, learning and research.

To provide quality education and training, the University will continue to involve stakeholders in the vision of existing academic programmes and the development of new ones during this Strategic Plan. Practical orientation and relevance to market demand will guide the efforts in this direction. The University aims to recruit, develop, and retain quality academic staff continuously and is focused on the crucial need to improve the learning infrastructure through expansion and modernization.
